

Metal Shears*

Ideal for ferrous and non-ferrous scrap applications, the metal shears will handle H and I beams, plate, rebar, pipe, round stock, wire, tires and concrete. Featuring 4-way indexible blades, and replaceable wear parts. Available with either 360° hydraulic continuous rotation, or manual rotation. This attachment is available for compact excavators as well as skid loaders.

****Note: Must be used with poly-carbonate front door/window to protect operator.***
