

Backhoes

Turn your skid-steer into a powerful excavator with a backhoe. This multi-purpose attachment simplifies jobs like digging utility trenches or septic tanks. In addition to the standard backhoe, the Mini Backhoe is extremely versatile and economical. It mounts easily to skid-steers using the universal quick attach system.

Backhoe. The backhoe allows you the advantage of handling straight and wall power-digging jobs, as well as utility trenches, septic tanks and other excavation jobs. Models offer digging depths that range from 8'1" to 11'1" and bucket dig force ranging from 3,670 lbs. to 6,167 lbs.

Mini Backhoe. Take full advantage of your skid-steer's mobility with the mini backhoe. This is an excellent attachment for digging trenches and footings. The mini backhoe mounts quickly and easily, has a digging depth of 5'6" and is available in three bucket sizes. No stabilizers are required.

Backhoe Buckets

The right sized Backhoe Bucket will allow your skid-steer to be even more efficient. Buckets are available in 12", 16", 18", 20" and 24" sizes.
