

## Specialty Buckets

Though they may be designed for different applications, specialty buckets from NA have at least three things in common: they're tough, attach easily and allow your compact equipment to take advantage of its power and mobility for a very particular job.

**Rock Hog Stone.** Designed for picking up stones and large, awkward debris, the Rock Hog bucket is a must have for all loader operators in the agriculture, commercial, industrial and landscaping industries. Available in widths ranging from 72" to 84".

**Yukon Jack.** This is one of the best buckets to turn your loader into a more profitable working machine. The Yukon Jack is perfect for applications that involve prying, removing, lifting, sifting or shaving. Its tines are 4" wide and 4' long and are designed with a tapered end for easy ground penetration. Available in widths ranging from 48" to 62".

**Four-In-One Combination.** The multi-tasking, 4-in-1 bucket keeps your loader productive and profitable. This bucket can be used in a wide variety of applications, like site clean-up, grading, scraping, grappling, grabbing, dozing dirt, brush removal, material spreading and others. Available in many width sizes.

*Replaceable cutting edges and heavy-duty hydraulic cylinders included.*

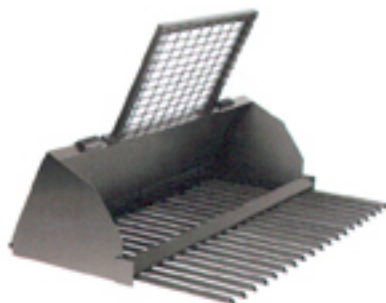

**Side Discharge Bucket.** Side discharge buckets are available for sand or sawdust. These are a must have for many farming applications. The sand bucket features a baffle brace to improve material flow and keep weight off the belt. The sawdust bucket has a beater to help prevent bridging of materials. Both types are available in many sizes to fit your loader and your application.
