

Pallet Forks

Pallet forks are vital attachments for any industry where bulky baled or palletized materials are moved. CEAttachments offers two styles of pallet forks for every preference, and every job!

**Rail Style-
Standard with
Spill Guard**

Rail Style Forks. Rail style fork frames have a notched bar across the back where the forks and slide back and forth. Lift a lever to move the forks from side to side. A brick guard is standard equipment. Tine lengths are available from 36" (914 mm) to 72" (1828 mm). Block forks are also available.

**Shaft Style-
Optional Spill Guard**

Shaft Style Forks. Fork tines are slid back and forth along the 2" round shaft holding the tines on. The brick guard is optional on the shaft style pallet fork. Tine lengths available are 36" (914 mm), 42" (1066 mm), or 46" (1168 mm).
