NYE Extreme Service Demolition Grapple: Worlds Strongest, Ground Zero Proven.

Gorham ME, January 15, 2007 – National Attachments Incorporated is proud to introduce this complete line of top quality extreme service demolition grapples are custom fabricated to fit all excavating makes and models from 4 to 180 tons, and are certified Ground Zero Proven to have the strength and durability to withstand the most extreme applications.

Custom fabricated with 120,000psi quenched and tempered multi-alloy Swedish steel plate, with hardened pins and bushings throughout. NYE Grapples' tines are a box section design made from T1 structural plates that extend from the tips all the way to the plate. The continuous tine design makes NYE Grapples the strongest in the world.

Known for extra strong construction, designed for heavy demolition work: we guarantee the longest life. Optional shear plates available for wood waste and garbage crushing ability are ideal for maximum efficiency operations. Featuring simple pin-on installation, all models also available with Quick Coupler systems.\
