NYE Extreme Service Concrete Pulverizer: Innovative Power and Performance.

Gorham ME, January 11, 2007 – National Attachments Incorporated is proud to introduce the next level of Extreme Performance Pulverizers. This NYE manufactured Extreme Service tool crushes pre-cut cast or cast-in place concrete, asphalt, rock, pipe, decking, and airport tarmac and is ideal for in-place demolition or implosion cleanup.

A fourth generation design with super strong construction and replaceable crushing jaws, convertible with a live back jaw to increase crushing forces, this tool was designed to process concrete of all forms. Custom-fabricated with 100,000psi quenched and tempered multi-alloy Swedish steels with hardened pins and bushings throughout; this extreme service pulverizer is designed to endure years of the toughest applications possible.

This highly efficient demolition and processing tool crushes reinforced concrete with ease, couples and uncouples in a snap, separates steel rebar from concrete, and recovers recyclable materials from steel reinforced concrete. Features include; pin-on simple installation with back brace welded to underside of dipper-stick, low cost, high output, safe and silent operation. Available for all excavator makes and models (9,000 – 150,000Lbs).
