TOWTEM Articulating Grapple System (AGS): Hydraulic power versatile as your hand and stronger than all competitors; here is the excavator attachment that does everything.

Gorham ME, January 12, 2007 – National Attachments Incorporated is proud to introduce the innovative design and extreme durability of the Towtem Articulating Grapple System. With a 360° continuous rotation, full articulation, High Strength T-1 Steel, Algoma 400 cutter blades, and clean durable design this Grapple system is an asset to every application.

Towtem is the finest grapple on the market, with the most versatile applications available. For all land clearing, digging, logging, rock placing, refuse handling, pole setting, ditching, wall building, dredging, and mining applications, the Towtem Articulating Grapple Systems add speed, efficiency, and extreme durability for all job services.

Standard Grapple rotation; 17 inch Geared Turntable Bearing, 50,000Lb Breakout Force, 18 inch wheel motor. Heavy Duty Grapple rotation; 20 inch Geared Turntable Bearing with 150,000Lb Breakout force, both with a 5 tooth configuration and hardened pins and bushings throughout. One man, one machine, every application.
